a
1
Druggable genome
10,983 genes
2
Blood cis-eQTL instruments
19,935 datasets
3
Allergic conjunctivitis GWAS
(FinnGen)
4
Wald ratio / IVW
6,329 genes tested
5
Colocalization + SMR/HEIDI
47 candidates
6
Single-cell depth-stratified DE
600-gene signature
7
CMap reversal screen
46 compounds
8
PheWAS safety screen
14 genes x 1,400 endpoints
9
Five-axis integration
1 Tier 1 candidate
b
Pooled genes
With cis-eQTL
